**Testimonial Letter**

Our institution is the beneficiary of a Micro8000 Nitrogen-Gas Generator purchased from Texol Products Ltd, of Great Britain. Since its installation at the beginning of December 2006, the nitrogen generator ran nearly continuously and without any problems. It produces about 2 cubic meters of 99.99% purity nitrogen gas per hour. The generator was coupled to a Nitrogen Liquefier and the system produces about 40 liters of liquid nitrogen per day.

We are fully satisfied with our Texol nitrogen gas generator and recommend it to those who need the corresponding quantities of pure nitrogen. We also appreciate the help and good cooperation with the Texol specialists.

A handwritten signature in black ink, appearing to be "V. Barboiu", written in a cursive style.
